<b>Biography</b>		
<p>Dr. Jin Tae Hong is a professor of College of Pharmacy at Chungbuk National University. In addition, he serves as a director of Medical Research Center (MRC) supported by Korea Ministry of Science and ICT (MSIT). He received his undergraduate degree from Chungbuk National University and his master's degree from same University. He completed his Ph.D of the University of Kentucky. Dr. Hong worked together with a multi-disciplinary team of scientist to develop anti-cancer and anti-neurodegenerative drugs. As Pharmaceutical scientist, his contribution has been significant in the research for basic mechanisms of the development of cancer and neurodegenerative diseases such as Alzheimer's disease (AD) and Schizophrenia (Sch). He continues to develop new targets and compounds treating lung and colon cancer as well as AD and Sch using big data and AI. He has published over 500 peer-reviewed articles.</p>
